# **Special Wartime Issue #18**

The end of their future ...

## From our readers:

Dear Leybl,

I would like to heartily recommend viewing the following new Star Trek fan videos - two of them are animated, and one is not:

- [https://www.youtube.com/watch?v=Azf\\_2WLE-As](https://www.youtube.com/watch?v=Azf_2WLE-As) – Animated Starship Mojave
- <https://www.youtube.com/watch?v=678P3lmMN1M> – Slipstream
- [https://www.youtube.com/watch?v=3B39\\_FS8\\_Lo](https://www.youtube.com/watch?v=3B39_FS8_Lo) – Animated Starship Defiant

The animated links are part of a series, whereas the real-life video is a standalone. Each one has its unique features (crew, plot, science fiction -- alternate dimensions, time realms, universes, experiments, etc.). The two animations take up less than 20 minutes each, while the Slipstream episode takes closer to 30 minutes. All contain suspense and mystery, as well as innovative and resourceful (sometimes unpredictable) denouements.

## Short, Short Reviews – by Leybl Botwinik

### 1) Avatar (#2) – The Way of Water (2022)

Like *Avatar* (2009, the first in the franchise), this film contains fantastic scenery and loads of imaginary creatures, in addition to the unique planet Pandora's natives themselves (the Na'vi, 10-foot-tall (3.0 m), blue-skinned, sapient humanoids that live in harmony with nature).

Wikipedia has a nice summary of the original film here:

[https://en.wikipedia.org/wiki/Avatar\\_\(2009\\_film\)](https://en.wikipedia.org/wiki/Avatar_(2009_film))".

Also, like in the original film, the new '*Avatar 2*' film deals with issues of ecology and acceptance between different races/species: Humans and the Na'vi, as well as between the different Pandoran tribes, and even with the flora and fauna. It also has 'good/friendly' humans vs. nasty 'bad guys'.

Sadly, the bad guys are specifically named as **US Marines (USMC)**. Sadly, because I always looked up to the US Marines as being the good guys. Sure, there are rotten people in any society (and any army has its share

of traitorous or just plain nasty soldiers) – but the USMC has always been considered a beacon of light – though not in this case (see: <https://indyfilmlibrary.com/2023/02/20/save-the-planet-kill-a-marine-james-cameron-and-the-blockbusting-ideological-critiques-of-the-avatar-films/>).

That having been said, this extraordinary film with bigger than life heroes (literally) and black-on-white bad guys – aided by a tremendous budget expenditure of hundreds of millions of dollars – is worth watching the full nearly 3 hours. Note that the 3<sup>rd</sup> installment in the franchise *“Avatar: Fire and Ash”* is set for a December 2025 release, and I’m looking forward to seeing it.

## 2) Under the Skin (2013)

This one is a very scary one. Somewhere between SF and Horror. A very interesting blend of *‘we are not alone on this planet’* Earth ... I only watched it to the end because of the actress, Scarlett Johansson. She plays an attractive female who preys on men, leading them to their death (in a very strange way). The plot reminded me of the mythological Sirens – the beautiful but sinister mermaids – who would lure sailors into leaping off their ships only to sink to the bottom of the waters to drown in the depths.

According to Wikipedia, it won multiple awards and recognition (see: [https://en.wikipedia.org/wiki/Under\\_the\\_Skin\\_\(2013\\_film\)](https://en.wikipedia.org/wiki/Under_the_Skin_(2013_film)) ).

The film takes place in Scotland, which is another reason to watch, though definitely not for the weak of stomach.

## 3) Every Day (2018)

Another *‘we are not alone on this planet’* story, which somehow reminds me of Shakespeare’s Hamlet:

*“There are more things in heaven and earth, Horatio,  
Than are dreamt of in your philosophy”*

The main plotline is about a lost soul – a wandering spirit – that takes over a new body each day. Strangely enough, only of teenagers... and this spirit becomes romantically intrigued with a particular girl, Rhiannon, making the movie also a ‘coming of age’ story for the young 16-year-old protagonist.

The wandering spirit has, apparently, been around for a long time – possibly centuries and therefore knows a lot about the language and customs of the people in the surroundings. However, it has no conscious control over whose body it will enter (i.e. wake up in, in the morning). It will only enter someone in the immediate vicinity, and every day, in someone else’s body. The original ‘owner’ of the body gets blanked out for a period of 24 hours...

There seem to be a number of unanswered and probably conflicting issues regarding the ‘body invasions’. Some questions I would ask it – if I could: Can you take over a non-human form (bird or cat, for example)? What happens if you are in an isolated small town or island – will you repeat-take over the local people’s bodies?

In general, entertaining. For a full plot synopsis, see: [https://en.wikipedia.org/wiki/Every\\_Day\\_\(2018\\_film\)](https://en.wikipedia.org/wiki/Every_Day_(2018_film)) .

[Personal note: I only decided to see the 2018 movie now, because I was worried it might be similar to my and my son’s *“Tragedy of a Shapeshifter”* that we recently published, and people might accuse us of stealing ideas. Not to worry: There is practically nothing similar 😊 - LB]
